Signal Processing 61 (1997) 299–300

SIGNAL PROCESSING

Cumulative contents of Volume 61

Volume 61, No. 1, August 1997

Papers

J.A.B. Gerald, N.L. Esteves and M.M. Silva
IIR echo canceller using a dual error criterion and incorporating a lattice structure 1
S. Joshi and J.M. Morris
On a novel critically-sampled discrete-time real Gabor transform 9
T.W.S. Chow, H.-Z. Tan and G. Fei
Third-order cumulant RLS algorithm for nonminimum ARMA systems identification 23
C. Shen and U. Lemmin
Ultrasonic intensity power spectrum estimation by using the bispectral reconstruction technique 39
C.E. Savin, M.O. Ahmad and M.N.S. Swamy
A modified binary-tree search architecture for two-dimensional stack filtering 45
Y. Chen and E.R. Dougherty
Optimal and adaptive reconstructive granulometric bandpass filters 65
J. Assaad, A. Menhaj, J.M. Rouvaen, C. Bruneel and P. Deloof
Signal processing study for an FM CW collision avoidance radar system 83

Volume 61, No. 2, September 1997

Special Section on Intelligent Methods for Signal Processing in Image Communication
Guest-Editor: F. Pérez-González

F. Pérez-González
Editorial 89
E. Del Re and L.S. Ronga
Blind adaptive MUD with silence listening 91
Á.M. Bravo
Shortened time-invariant decorrelating detector for DS/CDMA asynchronous systems 101
O. Muñoz, J.A. Fernández-Rubio
Cancellation of external and multiple access interference in CDMA systems using antenna arrays 113
C. Breining
Control of a hands-free telephone set 131
T. Adalı and X. Liu
Canonical piecewise linear network for nonlinear filtering and its application to blind equalization 145
C. Bousoño-Calzón and A.R. Figueiras-Vidal
A bank of Hopfield neural networks for the shortest path problem 157

Regular papers

K.-C. Fan, K.-S. Kan and J.-C. Chang
Edge preservance and block effect reduction by block coefficient diffusion method 171
J. Astola, D. Akopian, O. Vainio and S. Agaian
New digit-serial implementations of stack filters 181

Elsevier Science B.V.

Volume 61, No. 3, September 1997

Papers

S. Palit
Signal extraction from multiple noisy sensors 199
B. Farhang-Boroujeny and Z. Wang
Adaptive filtering in subbands: Design issues and experimental results for acoustic echo cancellation 213
L. Goldfeld and D. Wulich
Performance of an MPSK correlation demodulator with decision feedback carrier recovery in the presence of a speech signal 225
B. Jelonnek, D. Boss and K.-D. Kammeyer
Generalized eigenvector algorithm for blind equalization 237
W. Philips
Fast orthogonalization algorithms for segmented image coding 265
S.K. Setarehdan and J.J. Soraghan
Automatic left ventricular centre point extraction in echocardiographic images 275
M. Barkat and S. Dib
CFAR detection for two correlated targets 289
